

Wai-Yeung Wong was born in Hong Kong. He obtained a B.Sc.(Hons.) degree from the University of Hong Kong, and went on to complete his Ph.D. there under the supervision of Prof. W.-T. Wong. After a postdoctoral stay at Texas A&M University under the direction of the late Prof. F. A. Cotton, he worked in the groups of Profs. The Lord Lewis (FRS) and P. R. Raithby at the University of Cambridge as a Croucher Research Fellow. He joined the Hong Kong Baptist University as Assistant Professor in 1998, was promoted to Associate Professor in 2003 and to Professor in 2007. His research interest focuses on synthetic inorganic and organometallic chemistry and structural chemistry, with specific emphasis on the development of novel molecular functional materials and metallopolymers for OLED/PLED and solar cell applications, nonlinear optics and nanotechnology. He is internationally renowned for his research in functional metallopolymers and metallophosphors. He has a distinguished publication record of over 260 publications in refereed journals and more than 10 (co-)authored books. He is listed among the world's top 1% in the Institute for Scientific Information (ISI) list of most cited chemists. He was admitted as Chartered Chemist in 2000 and Fellow of the Royal Society of Chemistry in UK in 2005. He received the HKBU President's Award for Outstanding Performance in Teaching in 2007 and was named as the Croucher Senior Research Fellow in 2009. He currently serves on the editorial boards of seven international scientific journals including Journal of Organometallic Chemistry, Macromolecular Rapid Communications, Comments on Inorganic Chemistry, and Journal of Inorganic & Organometallic Polymers & Materials, Macromolecular Research, etc. He is also the Chairman of the Hong Kong Chemical Society and the Secretary of the Royal Society of Chemistry (Hong Kong Section).
